PIC 10A Section 2 - Homework # 1 (due Monday, January 10, by 11:59 pm)

You should upload each .cpp (and .h file) separately and submit them to CCLE before the due date/time! Your work will otherwise not be considered for grading. Do not submit a zipped up folder or any other type of file besides .h and .cpp.

Be sure you upload files with the precise name that you used in your editor environment otherwise there may be linker and other errors when your homeworks are compiled on a different machine. Also be sure your code compiles and runs on Visual Studio 2022.

SHARING A QUOTE

This homework will give some practice in displaying a message to the console. You should submit a single file **quote.cpp**.

Please refer to the syllabus for how the work will be graded: note that more than half of the marks come from good coding practices and code documentation. The program should execute in the following manner. You must make sure the output matches the format below.

Hello, world! My name is [YOUR NAME].

One of my favorite quotes is:

"[THE QUOTE - NOTE HOW IT APPEARS IN QUOTES!]" ~[QUOTE SOURCE]

I like this because [YOUR REASON].

Note the blank line between paragraphs!

Here's an example of the output you should get. Note that the ONLY items that should differ from student-to-student are the square bracket parts. Everything else must conform to the exact format requested.

Note: In Visual Studio, after a program runs there are additional printouts generated through the IDE. You can ignore those.

```
Hello, world! My name is Mike.

One of my favorite quotes is:

"The only true wisdom is in knowing that you know nothing." ~Socrates

I like this because I believe having an awareness of our ignorance can lead
us to great discoveries.
```
